## Summary

I am a **bilingual software developer** with **10 years of experience** in the **design and implementation** of **scalable and user-friendly web applications**. I specialize in **frontend development** using **React, Angular, JavaScript, and TypeScript**. I am passionate about working with design systems, **creating and reusing components**, and **building seamless user experiences**. I have a proven ability to **collaborate effectively in global agile teams** and am skilled in using **modern web tools and technologies** to deliver **high-quality solutions**. I am currently **exploring artificial intelligence tools** to integrate into my daily work and **increase my productivity**.

## Experience

### Senior Frontend Engineer at Proxet

 Aug 2023 - Present  Bogotá D.C ( Hybrid Role )

Led the **migration of applications** from **Angular 13 to React** with TypeScript, modernizing the tech stack and **improving performance and maintainability**. Developed **reusable components** and a **browser extension** with autocomplete functionality, eliminating reliance on external software. Additionally, **designed mockups and prototypes in Figma** for new functionalities, aligning them with business objectives and **enhancing user experience**. Currently, **I continue performing migrations, updating libraries, refactoring code, and optimizing application performance**.

### Senior Angular Developer at Newfire Global Partners

 May 2023 - Aug 2023  Remote

**Developed, maintained, and deployed functionalities** for the TruCare application using **Angular 13**, ensuring **operational continuity** and **product evolution**.

---

## Senior Software Engineer at Terminal Inc.

 Jan 2022 - Mar 2023  Remote

Implemented features for therapist-facing platforms using **Angular 12+** and maintained an embedded application developed in **Flutter**. I collaborated closely with the QA and design teams to ensure a **smooth delivery of functionalities** and **high quality standards**.

## Engineer II at Commure

 Sep 2021 - Jan 2022  Remote

**Led research on micro frontends with SingleSPA JS** to drive a modular and scalable architecture. **Designed and implemented reusable components** in **Angular and React** using **StencilJS**, improving development efficiency and consistency. Additionally, provided support for the Listrunner platform with **React**, resolving issues and ensuring optimal performance and functionality.

## Engineer I at Commure

 Sep 2020 - Aug 2021  Remote

Developed and implemented new functionalities and **resolved critical bugs** in the List Runner platform, **improving its stability** and **user experience**. **Integrated third-party services** such as **Sentry** and **Intercom** to optimize **system monitoring** and user communication. Additionally, conducted **research on CSS frameworks** to guide the development of **scalable** and efficient component libraries, **promoting a coherent and maintainable user interface**.

## Frontend Engineer at Merlin

 Sep 2019 - Aug 2020  Bogotá D.C

**Designed, developed, and optimized responsive pages** and applications using **Angular 7+** on the frontend and **Python** with **Jinja v2** on the backend to generate static pages, **significantly improving performance and search engine ranking**. Applied performance optimization techniques and **SEO best practices** to increase visibility, **loading speed**, and **user interaction**.

## Associate Engineer at Alert Logic

 Oct 2017 - Sept 2019  Santiago de Cali

**Designed and implemented responsive user interfaces** for Alert Logic products using **Angular 5+**, ensuring **cross-browser compatibility** and a seamless experience. Contributed to the **successful delivery of customer-facing projects**, including the Incidents and Health consoles, and supported the **migration of legacy AngularJS applications to Angular 2+**, improving their scalability and maintainability. Also provided ongoing support for existing applications and **trained interns, leading initiatives to increase unit and e2e test coverage**.

## Web developer Intern at Alert Logic

 Jul 2016 - Jul 2017  Santiago de Cali

During the web developer internship, I **improved software quality and reliability by increasing test coverage to 80%** and supported defect resolution in applications developed with **PHP and AngularJS**, while implementing new functionalities under the **SCRUM agile methodology**. Additionally, I **automated the generation of user story documentation** using **Robo and LaTeX**, which **significantly streamlined project workflows**.

## Skills

### Technical

→ React                      → NextJS  
→ Angular                    → Bootstrap  
→ HTML                      → MUI  
→ CSS                        → Figma  
→ JavaScript                → UX  
→ TypeScript                → SEO

### Soft

→ Problem Solving  
→ Team collaboration  
→ Communication  
→ Leadership  
→ Time management  
→ Adaptability

### Languages

→ Spanish ( Native )  
→ English ( C1 )

## Education

### Computer Science at Universidad del Valle

 2011 - 2017  Santiago de Cali
